SaniTabs - Water Purification Tablets

(NaDCC) – Effervescent or Non-effervescent types

Water Purification Tablets are used for disinfection and purification of water, water tanks and delivery systems. They are soluble tablets which, when dissolved in water, gives a measured dose of available chlorine and thereby provide a convenient, economical and accurate method for small scale and emergency water purification. The product is produced in The Netherlands.

Composition

Each tablet cont.: Sodium Dichloroisocyanurate (NaDCC) equivalent to eg. 1 gram of available Chlorine.

Usage

Available chlorine in ppm/ltr. from 1 tablet of 1 gram each when dissolved in:

Amount of water	Available chlorine
1 litre	1.000 ppm/ltr
50 litres	20 ppm/ltr
100 litres	10 ppm/ltr
200 litres	5 ppm/ltr
400 litres	2.5 ppm/ltr

Appearance

White flat-faced bevel-edged tablets / non-effervescent or effervescent types.
Packed in sealed white HD-PE jars.

Shelf-life

3 years from manufacturing date. Storage is important for the shelf-life of the product. (see below)

Technical Specifications / Limits

Active chlorine:	1000 mg /tablet	Limit: 926 – 1112 mg / tablet
Middle weight:	1.83 g / tablet	Limit: 1.69 – 1.97 g / tablet
Tablet diameter:	20 mm	Limit: 19.3 – 20.6 mm
Tablet height:	3.7 mm	Limit: 3.2 – 4.1 mm
Tablet hardness:	34 N	Limit: 20 – 50 N
Dissolving time at 20°C:	15'	Limit: Max. 15'

Storage

Protect from light. Avoid high humidity. Store in a dry and ventilated place, below 25°C.
Keep container well closed.

Health and Safety

May bleach fabrics. Not harmful if used as directed. In case of contact with eyes, irrigate with plenty of water and if necessary obtain medical advise. In case of ingestion, an upset stomach may be remedied by milk given orally, but if necessary obtain advice. Wash out empty containers thoroughly and dispose of safely. Keep out of reach of children, uninformed persons and animals. Contact with acids liberates toxic gas.

DO NOT SWALLOW THE TABLETS – KEEP OUT OF REACH OF CHILDREN
